PREPREG CARBON

CARBON

Shaft type	+	Blade Size
SKINNY OVAL F35 TYPE II		M, L
26MM F40 TYPE II		S, M, L
29MM F30 TYPE II		L, XL
29MM F35 TYPE II		L, XL
29MM F40 TYPE II		M, L
27.5MM F40 TYPE II		M, L
29MM 2PCS F35 TYPE II		M, L

Shaft type	+	Blade Size
29MM F40		S, M, L, XL
29MM 2PCS F35		S, M, L, XL

KEY FEATURES

- **DOUBLE CONCAVE DESIGN**
The double concave design gives the paddle stability, tracking and an even power spread across the blade surface. This allows you to have even power throughout your stroke while reducing splash on entry and exit.
- **THIN BLADE TIP**
For the cleanest catch, the blade tip is thin and flat, resulting in the cleanest entry and exit in the water and less impact on your body.
- **SEAMLESS CONNECTION**
The Velocity blade features a new, inbuilt shaft connection that gives you a seamless join from blade to shaft.
- **ERGONOMIC HANDLE**
The handle is designed to provide a powerful grip, making it ideal for any type of racing, whether long-distance or sprint. The flat top and wide grip create powerful leverage for the whole paddle and the blade. You can steer the paddle at slight angles and remain at full power.

26mm round shafts now feature a new M-size handle.

- **WINGLETS**
The Winglet design is inspired from our findings in foiling. The winglets borders the blade and creates less turbulence. This helps the paddle to pull smoother through the water with less flutter.
- **ANGLE OF ATTACK**
The 14.33-degree angle gives you a longer reach on each stroke – allowing for a longer stroke and smoother paddling.
- **CARBON PRO SHAFT**
Prepreg carbon shaft, which is super light, strong and responsive shaft technology.
The shaft features a new anti-slip unidirectional texture that is grippy when wet.
- **ANTI-TWIST INNER & SMOOTH CLAMP**
Easy and reliable alignment. The wide clamp for a quick and effortless release and reduced water infiltration.
Available on 2 pcs paddles.

PREPREG CARBON

CARBON

Shaft type	+	Blade Size
SKINNY OVAL F35		M, L
26MM F40		S, M
29MM F30		XL, XXL
29MM F35		L, XL
29MM F40		M, L
27.5MM F40		M, L
29MM 2PCS F35		M, L

Shaft type	+	Blade Size
29MM F40		M, L, XL
29MM 2PCS F35		M, L
29MM 3PCS F35		M, L

KEY FEATURES

- **TWIN RIBS SHAPE**
The ribs create blade strength and ability to cut through the water faster and reduces 15% of core volume of the blade.
- **THE CONCAVE**
The concave on the power face is guiding the water throughout the blade controlling the wobbling and increasing the water flow speed. All your power is transferred in a straight forward motion as you don't need to worry about paddle alignment in the water.
- **10° BLADE ANGLE**
The Lima features a 10° angle at the blade neck, for an efficient power phase catch.
- **ERGONOMIC HANDLE**
The handle is designed to provide a powerful grip, making it ideal for any type of racing, whether long-distance or sprint. The flat top and wide grip create powerful leverage for the whole paddle and the blade. You can steer the paddle at slight angles and remain at full power.
26mm round shafts now feature a new M-size handle.
- **NARROW AND FLAT PROFILE**
A unique narrow and flat profile allows you to pull the blade very close to the rail of the board, giving it a nice line.
- **STIFF AND STRONG BLADE**
The combination of UD and 3K carbon enhances the blade's strength and stiffness. This results in a more durable and responsive performance during intense paddling sessions.
- **REFINED SHAFT**
The new Carbon and Carbon Pro shafts have been refined for the perfect balance of weight and strength. Both feature a new anti-slip unidirectional texture, providing a secure grip when wet.
Carbon Pro shaft pairs with Prepreg blades.
Carbon shaft pairs with Carbon blades.
- **ANTI-TWIST INNER & SMOOTH CLAMP**
Easy and reliable alignment. The wide clamp for a quick and effortless release and reduced water infiltration.
Available on 2 pcs paddles.

CARBON

Shaft type	+	Blade Size
29MM F40		S, M
29MM 2PCS F35		M, L
29MM 3PCS F35		M, L

KEY FEATURES

- **THE CONCAVES**
The four pronounced concaves provide an incredibly precise and powerful catch right from the start. The design allows for smoother water flow around the blade, increasing paddling cadence and efficiency.
- **REFINED SHAFT**
The new Carbon and Carbon Pro shafts have been refined for the perfect balance of weight and strength. Both feature a new anti-slip unidirectional texture, providing a secure grip when wet.
Carbon Pro shaft pairs with Prepreg blades.
Carbon shaft pairs with Carbon blades
- **ANTI-TWIST INNER & SMOOTH CLAMP**
Easy and reliable alignment. The wide clamp for a quick and effortless release and reduced water infiltration.
Available on 2 pcs paddles.
- **13° BLADE ANGLE**
The 13° angle makes the Enduro blade versatile for all conditions. It's ideal to push you out of the water fast enough to catch waves as well as easy cruising on flat water, providing speed without needing advanced technique.
- **ERGONOMIC HANDLE**
The handle is designed to provide a powerful grip, making it ideal for any type of racing, whether long-distance or sprint. The flat top and wide grip create powerful leverage for the whole paddle and the blade. You can steer the paddle at slight angles and remain at full power.
26mm round shafts now feature a new M-size handle.

ALL ROUND / WAVE

FLUX PADDLE

NEW

1st order: April 2026
1st shipment: June 2026
Public Release: July 2026

BUILT FOR FLOW

Flux combines the trusted stability of the Enduro with the smooth, race-inspired efficiency of the Velocity. The result is a paddle that feels lighter on the body, smoother through the stroke, and effortless at higher cadence.

Less force. More flow.

TUFSKIN PADDLE

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

DURABLE PERFORMANCE

A great value paddle – best durability for a price point paddle.
Created for entry-level paddlers
Great travel option - 3pcs 91 cm detached
Convertible to kayak mode with blade add-on (sold separately)

ADULT

Shaft type	+	Blade Size
29MM 2PCS F35		One Size
29MM 3PCS F35		One Size

KIDS

Shaft type	+	Blade Size
26MM 2PCS F40		One Size

ADD-ON FOR KAYAK

NO SHAFT, BLADE ONLY	
Without groove	One Size
With groove	One Size

KEY FEATURES

- **LIMA SHAPE WITH CONCAVE**
Legendary shape with proven high performance. The concave transfers all your power in a straightforward motion as you don't need to worry about paddle alignment in the water.
Kids paddle features an Enduro blade shape.
- **LARGE TIP AREA**
Allows for max forward motion even if the blade is not totally submerged. Useful for entry-level paddlers.
- **REFINED SHAFT**
The Carbon shafts have been refined for the perfect balance of weight and strength. The shaft feature a new anti-slip unidirectional texture, providing a secure grip when wet.
- **CONVERTABLE TO KAYAK MODE**
Discover the ultimate kayaking experience using an additional blade insert to switch your paddle into kayak mode. The blade insert sold separately.
- **ANTI-TWIST INNER GROOVING**
Easy and reliable alignment and ensures consistent hand placement during strokes. Paddle Care note: Do not pull the inner shaft out further than the "maximum" point indicated on the shaft.
- **ERGONOMIC HANDLE**
The handle is designed to provide a powerful grip, making it ideal for any type of racing, whether long-distance or sprint. The flat top and wide grip create powerful leverage for the whole paddle and the blade. You can steer the paddle at slight angles and remain at full power.
- **SMOOTH CLAMP**
The wide clamp for a quick and effortless release and reduced water infiltration. 100% of grip on the inner shaft for an effortless and optimum grip.

ACCESSORIES

PADDLE BAGS

What's new?

- › New design
- › New Blue bag color

BLADE COVER

A lightweight protective cover built to keep your paddle blade safe between sessions. Simple, compact, and easy to carry anywhere.

Sizes: XS – S/ M – XXL

DOUBLE PADDLE SOFT BAG

Carry two fixed-shaft paddles (up to 220 cm) in one streamlined bag. With 8mm padding, it keeps both blades well protected and ready for your next session.

3 PIECE PADDLE SOFT BAG

Designed to fit three-piece adjustable paddles. Features a soft foam core, an internal blade divider to prevent scratching, and a mesh pocket for small essentials like wax, fins, or keys.

WHEEL TRAVEL PADDLE SOFT BAG

Discover the ultimate kayaking experience using an additional blade insert to switch your paddle into kayak mode. The blade insert sold separately.

KEY FEATURES

- **CARRY IT YOUR WAY**
Padded carry handles and an adjustable shoulder strap give you the freedom to move the way that feels right, from the car park to the water's edge.
- **ZIPS THAT LAST**
Heavy-duty zips run clean and smooth, session after session. No snagging, no fuss.
- **ROOM FOR THE SMALL STUFF**
A built-in accessory pocket keeps your keys, tools, or fins close and easy to find when you need them.

12'0"x33"x6"	365L	50-110 kg

DELUXE LITE KAYAK SET

10'8"x33"x6"	331L	45-100 kg

ONE WITH PADDLE

10'8"x33"x6"	331L	45-100 kg

KEY FEATURES

- **THE OUTLINE SHAPE**
It has a straight outline and a narrow mid-section, so you can keep the paddle closer to the board. This makes you feel more comfortable and stable while you also track better and glide faster.
- **WIDE TAIL**
The wide tail lets you step back and make fast and fun turns with full control.
- **BUNGEE TIE-DOWN SYSTEM**
Wide adjustable bungee tie-downs with new metal easy clips allow you to carry more gear.
- **FOLDABLE DROP FIN BOX**
3-piece foldable fin box lets the board roll 33% smaller for easier storage and travel, while reducing drag by 50%.
- **SOFT CARRY HANDLES**
Soft EVA neoprene handles make carrying and transporting your board more comfortable and easier.
- **D-RING SETUP**
All models feature a front nose D-ring for easy carrying or secure parking. All models except the ONE include four additional D-rings for attaching a kayak seat and footrest set or a shoulder strap setup.
- **KICK TAIL**
The raised kick tail provides a clear reference point for your back foot, making step-back turns easier and more controlled. It gives you something to push against when turning, helping you pivot the board with greater confidence, stability and control.
- **WELDED RAIL TECHNOLOGY**
A permanently airtight, mechanically welded seam delivers greater durability and reliability, eliminating the risk of glue weakening over time.

5 YEAR WARRANTY

*Extended warranty on leaking issues if registered within 3 month from purchase date

KEY FEATURES

- **THE OUTLINE SHAPE**
The boards have a straight outline and relatively narrow midsection so that you can keep the paddle closer to the board. This makes you feel more comfortable and stable while tracking better and gliding faster.
- **VOLUMINOUS NOSE AND SQUARER TAIL**
It helps you pop through chop, carry some gear and increase the boards stability, while the squared tail creates a platform to make fun step-back turns.
- **BUNGEE TIE-DOWN SYSTEM**
Wide adjustable bungee tie-downs with metal easy clips allow you to carry more gear.
- **SOFT CARRY HANDLES**
Soft EVA neoprene handles make Touring boards more comfortable to carry, especially when fully loaded with gear.
- **ROLL TECHNOLOGY**
Packs into a 33% smaller Roll board bag with roller wheels and hiking straps for easy travel and storage.
Option with Kayak set comes with an M-size board bag.
- **RAIL EDGE TECHNOLOGY**
Creates a sharp edge for the water to release smoothly for optimal glide and speed.
- **WELDED RAIL TECHNOLOGY**
Mechanically welded rails create a permanently airtight seam for greater durability and long-lasting performance, with no risk of glue weakening over time.

5 YEAR WARRANTY

1st shipment: June 2026
Public Release: September 2026

DELUXE

TOURING BOARD WITH TOP CONSTRUCTION & FEATURES

The Touring Deluxe is the top construction in the range, built with Fusion Woven dropstitch for extra strength and stiffness, while galvanized 2000D rails further enhance durability and rigidity. Despite its premium build, it still uses roll technology, allowing the board to pack down into a compact roll bag for easy transport and storage.

DELUXE LITE WITH PADDLE

TOURING BOARD WITH MORE FEATURES

The Touring Deluxe Lite is the lightest inflatable construction in the range, up to 2 kg lighter than regular constructions, built with Woven Dropstitch for a lighter and stiffer feel on the water. It also comes with a durable Tufskin paddle included, making it a complete and easy-to-use package for everyday touring.

SLIM NEW WITH PADDLE

THIN TOURING SHAPE

The 4.75" thinner profile lowers your center of gravity for a more stable and connected feel on the water, especially for lighter riders. Combined with the lightweight Deluxe Lite construction, it delivers easy handling, smooth glide and efficient paddling, while remaining compact and travel-friendly.

DELUXE LITE KAYAK SET

TOURING SHAPE WITH MORE FEATURES & KAYAK SET

Our most popular inflatable board, now fully equipped for a seamless kayak setup. This package features an incredibly light and durable inflatable board, a comfortable kayak seat and footrest, a 3-piece Tufskin paddle, and an additional blade-on for easy switching between SUP and kayak modes. Embrace the versatility and fun on the water!

ONE WITH PADDLE

TOURING BOARD IN AFFORDABLE SIMPLIFIED FORMAT

The most accessible way to begin your touring journey. Designed with simplicity in mind, the Touring One makes it easy to go further with every paddle stroke. Stable and smooth to glide, this board delivers efficiency and fun, giving you the confidence to explore new waters and discover the freedom of SUP touring.

ADVENTURE

GENERATION INFLATABLE

1st order: May 2026

Public Release: September 2026

GENERATIONS AHEAD OF THE REST

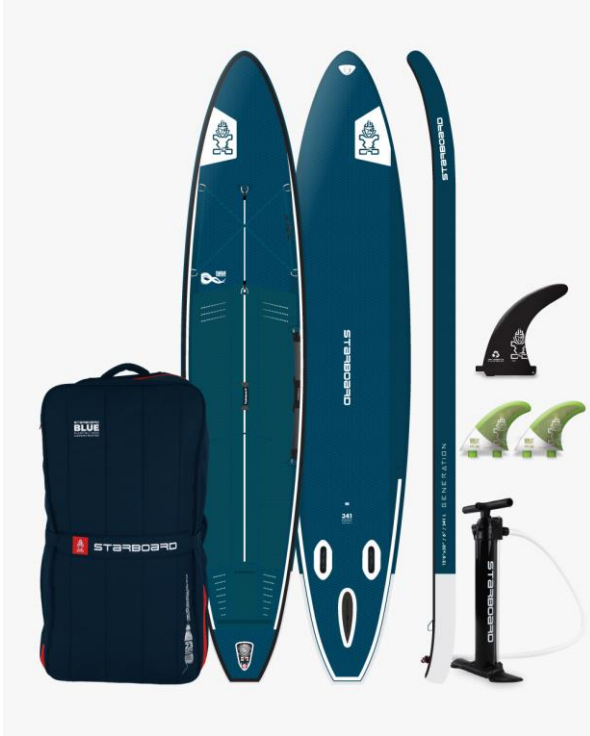

This board's outline is based on its composite counterpart and is the ultimate 3-in-1 board for you for Touring, Surfing and Racing.

What's new?

› New Color & Graphics

DELUXE

KEY FEATURES

- **THE OUTLINE SHAPE**
12'6" x 30" Generation is inspired by our award-winning Generation composite model.
- **PARABOLIC RAIL REINFORCEMENT**
Significantly increases board stiffness for improved surfing performance.
- **FIN SET UP**
The 2+1 setup includes 1 center fin and 2 side fins. It's recommended to use the center fin for touring and racing, while the side fins provide more control in the waves.
- **BUNGEE TIE-DOWN**
Wide adjustable bungee tie-downs with new metal easy clips allow you to carry more gear. A new center bungee helps to fix your gear.
- **EDGE RELEASE**
Creates a sharp edge for the water to release smoothly for optimal glide and speed.
- **WELDED RAIL TECHNOLOGY**
The Welded Rail Technology creates a completely airtight, mechanically bonded seam without the risk of glue weakening over time.

RACE

ALL STAR DELUXE

FASTER THAN MOST HARD BOARDS

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

Race in all conditions, anywhere. The All Star is built for paddlers who want race-winning speed with the convenience of an inflatable. Now featuring the Quick Tension System for faster setup and even greater stiffness, it's ready to perform in racing, training and all-condition paddling.

DELUXE

14'0"x24.5"x6"	310 L	50-90 kg
14'0"x26"x6"	323 L	60-105 kg
14'0"x28"x6"	367 L	60-155 kg

KEY FEATURES

- **QUICK TENSION SYSTEM**
Tighten your ride in one click. No need to deflate — adjust tension instantly with a secure, lightweight, and durable locking mechanism built for performance and convenience.
Available on Deluxe Construction.
- **AIRLINE TECHNOLOGY**
The free-flowing aramid cable locks the board in shape when inflated, creating a solid trustworthy hull sensation.

The patented Airline Technology utilises a pre-set free-floating cable. It is attached to the nose, goes under the bottom and ends at the fin box. The preset cable is slightly shorter than the board so, when the board inflates, the cable comes under tension and stiffens the board significantly. We measured 1.8 cm less hull deflection in testing and World Champion Connor Baxter swears by it.
Available on Deluxe Construction.
- **TWIN CARBON STRINGERS – DECK**
Positioned on the deck to increase the stiffness.
Available on Deluxe Construction.
- **RACE HANDLES**
Get an early lead with additional handles positioned for Tech/ beach race starts
Available on Deluxe Construction.
- **FIN SET UP**
The Airline fin box anchors the cable at the tail of the board, ensuring tighter rigging.
The board comes with a Race 23" Net Positive fin.
- **EVA STANDING TRAY**
Helps to hold wider stance for extra stability and helps recover balance with the EVA to push against. Provides more control to lean on the rail to steer the board from the midpoint.
Available on Deluxe Construction.
- **CARBON CENTER STRINGER – HULL**
Increases the stiffness and reflex sensation of the board, while covering the floating cable and creating a smooth surface.
Available on Deluxe Construction.
- **RAIL EDGE**
Creates a sharp edge for the water to release smoothly for optimal glide and speed.
- **NOSE CONE**
Guides the cable at the bow's center line, while creating the perfect nose shape. Made from up-cycled fishing nets.
Available on Deluxe Construction.
- **WELDED RAIL TECHNOLOGY**
The Welded Rail Technology creates a completely airtight, mechanically bonded seam without the risk of glue weakening over time.
- **FCS INSERT**
On the nose to attach accessories like a GoPro, phone holder, compass or GPS.
STAR Mount is supplied with every board to attach further accessories.
Available on Deluxe Construction.

5 YEAR WARRANTY

*Extended warranty on leaking issues if registered within 3 month from purchase date

RACE

ALL STAR DELUXE LITE

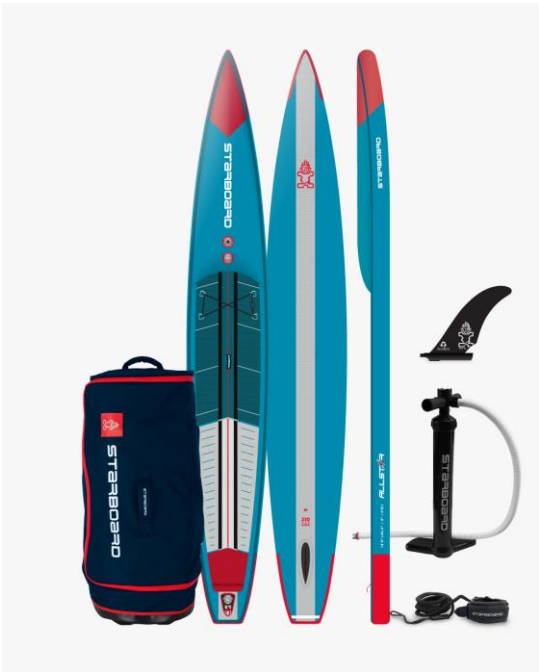

NEW

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

The NEW Deluxe Lite All Star has an extra nose chamber, adding volume to the front for a shape closer to composite race boards. This gives better balance and control in all water conditions. Built for speed and efficiency, it keeps a strong glide while staying stable through chop or flatwater. The foldable fin box lets the board pack easily into a roll bag, so it's easy to travel with, without losing performance.

DELUXE LITE

KEY FEATURES

- **NEW ADDITIONAL NOSE CHAMBER**
Extra nose chamber increases front volume, creating a shape closer to composite race boards for improved balance and control.
- **NEW SMART PRESSURE RELIEF VALVE**
Designed to automatically release excess pressure before it reaches critical levels, it helps protect the double chamber structure from over-inflation caused by heat, sun exposure, or pumping beyond the recommended pressure. A simple yet effective safety feature that enhances durability and gives you greater peace of mind on and off the water.
- **FOLDABLE DROP FIN BOX**
3-piece foldable fin box lets the board roll 33% smaller for easier storage and travel, while reducing drag by 50%.
- **BUNGEE TIE-DOWN**
Bungee in front of the standing area for storing gear and supplies so you can stay out on the water for longer. Essential for expeditions and long-distance paddles. *Now available on both Constructions.*

NEW 14'0"x21"x6"	271 L	30-55 kg
NEW 14'0"x24.5"x6"	310 L	50-90 kg
14'0"x26"x6"	323 L	60-85 kg

5 YEAR WARRANTY

*Extended warranty on leaking issues if registered within 3 month from purchase date

RACE

SPRINT INFLATABLE

THE FASTEST FLAT WATER INFLATABLE BOARD

Similar to its composite counterpart, the Sprint Inflatable features our patented Airline technology, designed to be fastest inflatable board in the flat water conditions. With a narrow nose to cut through the water surface, the center of balance sits behind the middle of the board providing great acceleration.

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

DELUXE

14'0"x24"x6"	281 L	50-70 kg
14'0"x25.5"x6"	296 L	50-80 kg

KEY FEATURES

- **QUICK TENSION SYSTEM**
Tighten your ride in one click. No need to deflate — adjust tension instantly with a secure, lightweight, and durable locking mechanism built for performance and convenience.
- **AIRLINE TECHNOLOGY**
The free-flowing aramid cable locks the board in shape when inflated, creating a solid trustworthy hull sensation.

The patented Airline Technology utilises a pre-set free-floating cable. It is attached to the nose, goes under the bottom and ends at the fin box. The preset cable is slightly shorter than the board so, when the board inflates, the cable comes under tension and stiffens the board significantly. We measured 1.8 cm less hull deflection in testing and World Champion Connor Baxter swears by it.
- **TWIN CARBON STRINGERS – DECK**
Positioned on the deck to increase the stiffness.
- **RACE HANDLES**
Get an early lead with additional handles positioned for Tech/ beach race starts
- **FIN SET UP**
The Airline fin box anchors the cable at the tail of the board, ensuring tighter rigging.
The board comes with a Race 23" Net Positive fin.
- **EVA STANDING TRAY**
Helps to hold wider stance for extra stability and helps recover balance with the EVA to push against. Provides more control to lean on the rail to steer the board from the midpoint.

Creates a dug out standing which makes it more versatile to paddle in choppy water as the water. Made with EVA so they are lightweight, soft to stand against and flexible when packing.
- **CARBON CENTER STRINGER – HULL**
Increases the stiffness and reflex sensation of the board, while covering the floating cable and creating a smooth surface.
- **RAIL EDGE**
Creates a sharp edge for the water to release smoothly for optimal glide and speed.
- **NOSE CONE**
Guides the cable at the bow's center line, while creating the perfect nose shape. Made from up-cycled fishing nets.
- **BUNGEE TIE-DOWN**
Bungee in front of the standing area for storing gear and supplies so you can stay out on the water for longer. Essential for expeditions and long-distance paddles.
- **WELDED RAIL TECHNOLOGY**
The Welded Rail Technology creates a completely airtight, mechanically bonded seam without the risk of glue weakening over time. This makes Starboard inflatable paddle boards stronger and longer lasting.

5 YEAR WARRANTY

*Extended warranty on leaking issues if registered within 3 month from purchase date

SURF

SURF INFLATABLE

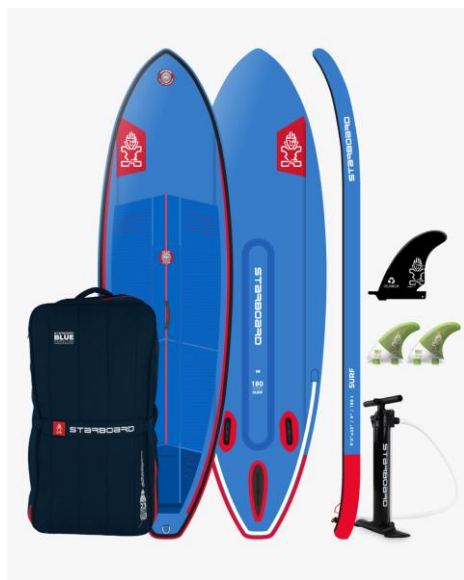

SURFING ON AIR

Travel-friendly surfing boards.
Wide standing area offers stability, while the pulled-in tail ensures responsive turning.
Double Chamber technology for rigid feeling.

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

DELUXE DOUBLE CHAMBER SURF

9'5"x32"x4"	180 L	40-105 kg
-------------	-------	-----------

DELUXE DOUBLE CHAMBER LONGBOARD

10'0"x30"x4"	189 L	40-100 kg
--------------	-------	-----------

KEY FEATURES

- **CURVED ROCKER LINE**
The nose rocker keeps your board from pearling during steep drops and radical manoeuvres. Tail kick helps to lift the nose during turns and change direction with ease.
- **WIDE STANDING AREA**
Gives stability and pulled-in tail makes for reactive turning.
- **DROP FIN BOX**
The outline improves the hydrodynamic efficiency of the box and reduce its drag by 50%. Smart reinforcements reduce the weight by 10%.
- **PARABOLIC RAIL REINFORCEMENT**
The added parabolic rail reinforcements on the deck and bottom of the board maximize the rigidity of the board.
- **KICK TAIL**
The raised kick tail provides a clear reference point for your back foot, making step-back turns easier and more controlled. It gives you something to push against when turning, helping you pivot the board with greater confidence, stability and control.
- **EDGE RELEASE**
The edge release technology gives you extra speed on those bottom turns and more release when you hit the lip.
- **FINS SET UP**
Fins are positioned close to the rail for the quickest response and control when turning. Thruster set up include 1 centre fin and 2 side fins. Thruster are more predictable and controlled in manoeuvres.
- **WELDED RAIL TECHNOLOGY**
The Welded Rail Technology creates a completely airtight, mechanically bonded seam without the risk of glue weakening over time. This makes Starboard inflatable paddle boards stronger and longer lasting.
- **RIGID FEELING**
Double chamber construction increases the overall stiffness giving you a snappier and more reactive ride. The chamber is positioned in front of the centre to control the shape and keep the nose from flexing.

5 YEAR WARRANTY

*Extended warranty on leaking issues if registered within 3 month from purchase date

CROSSOVER

LEARNER 4-IN-1 INFLATABLE

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

SUP – WINDSURF – WING SURF – WING PADDLING

Crossover board that makes learning fun & easy.
Wing or windsurf when the wind is up.
SUP when the wind is down.

What's new?

› New Graphics

DELUXE LITE

10'4"x31"x6"	310 L	45-105 kg
--------------	-------	-----------

KEY FEATURES

- **THE WIDE NOSE AND TAIL**
Provide you with enough stability, while the length and the parallel rails generate the glide and speed.
- **REMOVABLE MAST TRACK**
For a flat deck in the paddle board mode.
- **BUNGEE TIE-DOWN**
A bungee tie-down in front of the board, for storing gear and supplies. The bungee is attached with 4 D-rings which can be used to clip on your bags and gear
- **DROP FIN BOX**
The outline improves the hydrodynamic efficiency of the box and reduce its drag by 50%.
Smart reinforcements reduce the weight by 10%.
- **TWO REMOVABLE CENTER FIN BOXES**
Closer to the rails for better tracking and upwind reach. Remove the boxes for an improved paddling experience without the added weight or drag. Attach the boxes and mount the supplied Drake Shallow center fins to prevent the board from drifting sideways when windsurfing and wingboarding.
- **FOOTSTRAP INSERTS**
Make it easy to know where to position the feet and always be in the right spot to trim the board.
Footstraps are included with a board.
- **EDGE RELEASE**
Follows the contours of the board and creates a release edge that allows the boards to fully plane yet fold and roll up.
- **WELDED RAIL TECHNOLOGY**
The Welded Rail Technology creates a complete airtight, mechanically bonded seam without the risk of glue weakening over time. This makes Starboard inflatable paddle boards stronger and longer lasting.
- **KICK TAIL**
The raised kick tail provides a clear reference point for your back foot, making step-back turns easier and more controlled. It gives you something to push against when turning, helping you pivot the board with greater confidence, stability and control.
- **SOFT CARRY HANDLES**
Board features a soft EVA neoprene center handle that helps explorers make transporting the boards easier.
- **D-RING SETUP**
The board features a front nose D-ring for easy carrying or secure parking

5 YEAR WARRANTY

*Extended warranty on leaking issues if registered within 3 month from purchase date

CROSSOVER

WINGBOARD LEARNER

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

GETTING STARTED IN WINGING HAS NEVER BEEN MORE FUN

Compact size for easy manoeuvring.

Equipped as 3-in-1:

Windsurfing for lighter riders up to 80kg – features a mast base and center US side fins for upwind control.

Winging (without foil) center fin and forward side fins.

Paddling for kids and lighter riders.

What's new?

› New Graphics

DELUXE LITE

7'9"x31"x4.75"	195 L	Up to 100kg
----------------	-------	-------------

KEY FEATURES

- **EASY TO USE**
The Wingboard Learner measures 7'9" x 31", making it easier to maneuver and turn compared to the larger 10'4" Learner boards. This size is ideal for first-time riders, offering a more user-friendly experience.
- **THE WIDE NOSE AND TAIL**
Provide you with enough stability, while the length and the parallel rails generate the glide and speed.
- **REMOVABLE MAST TRACK**
For a flat deck in the paddle board mode.
- **BUNGEE TIE-DOWN**
A bungee tie-down in front of the board, for storing gear and supplies. The bungee is attached with 4 D-rings which can be used to clip on your bags and gear.
- **FOLDABLE DROP FIN BOX**
The outline improves the hydrodynamic efficiency of the box and reduce its drag by 50%. Smart reinforcements reduce the weight by 10%.
- **TWO REMOVABLE CENTER FIN BOXES**
Closer to the rails for better tracking and upwind reach. Remove the boxes for an improved paddling experience without the added weight or drag. Attach the boxes and mount the supplied Drake Shallow center fins to prevent the board from drifting sideways when windsurfing and wingboarding.
- **SOFT CARRY HANDLES**
The Wingboard Learner is designed with soft EVA neoprene handles on both the nose and tail, making it easy for everyone to carry and transport the board. Additionally, it features a flat carry handle at the bottom for added convenience.
- **EDGE RELEASE**
Follows the contours of the board and creates a release edge that allows the boards to fully plane yet fold and roll up.
- **WELDED RAIL TECHNOLOGY**
Every Starboard inflatable paddle board features welded rails. The Welded Rail Technology creates a complete airtight, mechanically bonded seam without the risk of glue weakening over time. This makes Starboard inflatable paddle boards stronger and longer lasting.

5 YEAR WARRANTY

*Extended warranty on leaking issues if registered within 3 month from purchase date

MULTI-PERSON

VISION

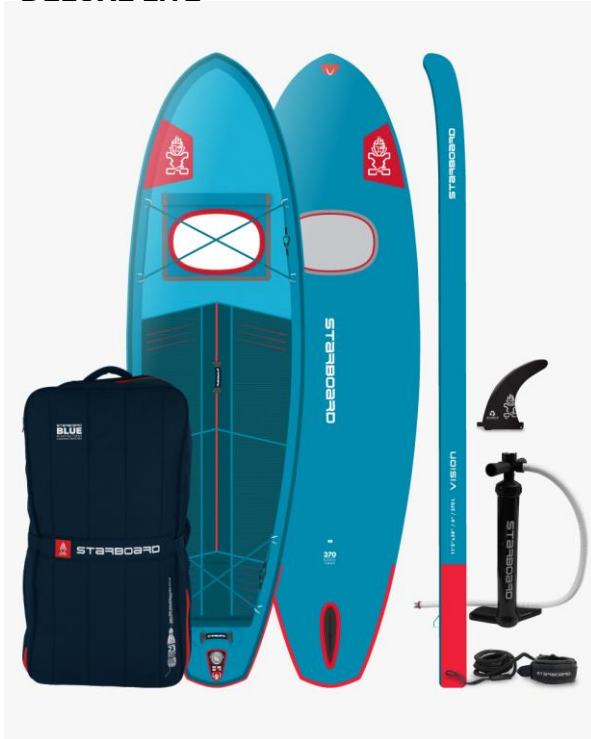

SEE THE OCEAN, SEE THE FUTURE

Large Viewing Window – See the underwater world beneath your board.
Wide & Stable – Perfect for families, beginners and exploring.
Full EVA Deck Pad – Soft, comfortable grip across the entire deck.

What's new?
› New Graphics

DELUXE LITE

KEY FEATURES

- **UNDERWATER VIEWING WINDOW**
The world's first underwater viewing window allows you to see what's underneath your feet. The kids' favorite toy.
- **SOFT CARRY HANDLES**
Boards feature soft EVA neoprene handles on the tail and center, that helps the explorers to make the transport of the boards easier.
- **BUNGEE TIE-DOWN SYSTEM**
Wide adjustable bungee tie-downs with new metal easy clips allow you to carry more gear. A new center bungee helps to fix your gear.
- **WELDED RAIL TECHNOLOGY**
The Welded Rail Technology creates a completely airtight, mechanically bonded seam without the risk of glue weakening over time. This makes Starboard inflatable paddle boards stronger and longer lasting.
- **DROP FIN BOX**
The outline improves the hydrodynamic efficiency of the box and reduce its drag by 50%. Smart reinforcements reduce the weight by 10%.
- **D-RING SETUP**
The board features a front nose D-ring for easy carrying or secure parking.

DELUXE LITE DOUBLE CHAMBER

16'0"x32"x6"	475 L	Up to 200 kg
--------------	-------	--------------

KEY FEATURES

- **DOUBLE CHAMBER**
 The second chamber offers secondary floatation for any emergencies while its sidewalls act like rollable I-BEAMS making the board ultra stiff.
- **SOFT CARRY HANDLES**
 Boards feature soft EVA neoprene handles on the tail and center, that helps the explorers to make the transport of the boards easier.
- **TWO REMOVABLE CENTER FIN BOXES**
 Closer to the rails for better tracking and upwind reach. Remove the boxes for an improved paddling experience without the added weight or drag. Attach the boxes and mount the supplied Drake Shallow center fins to prevent the board from drifting sideways when windsurfing.
- **BUNGEE TIE-DOWN SYSTEM**
 Wide adjustable bungee tie-downs with new metal easy clips allow you to carry more gear. A new center bungee helps to fix your gear.
- **3 REMOVABLE MAST TRACKS**
 Three removable mast tracks let you switch between paddling and windsurfing modes, or attach up to three sails to cruise together windsurf-style. Remove them for a clean, flat deck and improved comfort when paddling.
- **DROP FIN BOX**
 The outline improves the hydrodynamic efficiency of the box and reduce its drag by 50%. Smart reinforcements reduce the weight by 10%.
- **WELDED RAIL TECHNOLOGY**
 The Welded Rail Technology creates a completely airtight, mechanically bonded seam without the risk of glue weakening over time.

5 YEAR WARRANTY

*Extended warranty on leaking issues if registered within 3 month from purchase date

MULTI-PERSON

STARSHIP NEW ALL WATER

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

MAKE SUP A FAMILY SPORT

Built for groups – The ultimate board for families, friends and team adventures.

SUP & Windsurf – Paddle together or rig multiple sails for shared windsurfing sessions.

Supports up to 900 kg for maximum fun on flat water or in the waves.

What's new?

- › New Graphics
- › New Extra D-Rings to mount up to 4 kayak seats
- › Removed Double Chamber

ZEN

18'6"x60"x8"

1250 L

Up to 900 kg

KEY FEATURES

- **FITS 4 KAYAK SEATS**
16 D-rings spread across the board let you attach up to 4 kayak seats. Perfect for bigger groups who want to paddle together and have more fun on the water.
- **MULTIPLE HANDLES AND AIR VALVES**
All team members can help carry and pump up the board.
- **2 REMOVABLE MAST TRACKS**
For a flat deck in the paddle board mode.
- **PVC REINFORCEMENTS**
At the bottom side of the nose and the detail increases the scratch resistance of the board and makes it last longer.
- **BUNGEE TIE-DOWN SYSTEM**
For storing gear and supplies. The bungee is attached with 4 or 6 D-rings which can be used to clip on your bags and gears.
- **4 REMOVABLE CENTER FIN BOXES**
Closer to the rails for better tracking and upwind reach. Remove the boxes for an improved paddling experience without the added weight or drag. Attach the boxes and mount the supplied Drake Shallow center fins to prevent the board from drifting sideways when windsurfing.
- **WELDED RAIL TECHNOLOGY**
The Welded Rail Technology creates a completely airtight, mechanically bonded seam without the risk of glue weakening over time. This makes Starboard inflatable paddle boards stronger and longer lasting.
- **STARSHIP BOARD BAG**
Light and large. Easy to carry with 2 handles on the sides.

SUP

HARDBOARD

STARBOARD

CONSTRUCTION OVERVIEW

DUAL DENSITY

D2 is an advanced moulding technology that reduces board weight while maintaining structural integrity. A lighter-density EPS core is fused with a higher-density outer crust, creating a harder shell that requires less external laminate. The result is a lighter, more responsive board that retains the strength required for real-world use.

XTEC Carbon D2 balances low weight, stiffness and durability for responsive performance across surf, race and adventure boards. Carbon Load Frame Technology adds structural rigidity, while reinforcements in the standing area, rails, nose and tail protect key load and impact zones.

SURF BOARDS

Reduced weight makes the board easier to accelerate, turn and react on the wave, improving manoeuvrability while also making it easier to carry.

RACE / ADVENTURE BOARDS

Reduced weight improves glide efficiency and handling over distance. The stiff, reinforced structure maintains reliable performance across racing, touring and varied paddling conditions.

Available in: GO Surf, Whopper, Roamer, Touring, Generation, All Star, Gen R

vs

→ 10'0"x34" Whopper Xtec Carbon 9.8kg vs Limited Series 10.4kg
→ Xtec Carbon have a full Carbon UD rail band.

vs

→ 10'0"x34" Whopper Xtec Carbon D2 9.8kg vs Blue Carbon 10.5kg
→ 14'0"x27" Gen R Xtec Carbon D2 13.19kg vs Blue Carbon 13.68kg

vs

→ 10'0"x34" Whopper Xtec Carbon D2 9.8kg vs Lite TEch 10.43kg
→ 14'0"x25" Gen R Xtec Carbon D2 12.5kg vs Lite Tech 14.0kg

Our lightest full-carbon race construction to date, Carbon Reflex D2 is designed for maximum stiffness, controlled flex and rapid acceleration. The lightweight structure transfers power directly and responds instantly with every stroke, while targeted protection maintains reliability in demanding race conditions.

- Ultra-light 100 g biaxial carbon delivers an exceptional strength-to-weight ratio
- Carbon reinforcements along the rails and bottom tune flex and recoil for acceleration
- UD 80 carbon rail band increases stiffness and power transfer
- Full PVC standing area protects against heel dents
- Reinforced nose, tail and sharp edges improve impact resistance

Available in: Longboard Surf, All Star, Gen R, Katana, Tsurugi

vs

→ 14'0"x21.5" All Star CRS D2 11.0kg vs Blue Carbon Sandwich 11.7kg

PineTec D2 evolves our proven touring construction with reduced weight and a more responsive feel, while retaining the strength and reliability required for long-term use. Its full Australian pine deck sandwich and durable rails provide dependable protection for regular touring.

- Full 0.6 mm pine deck sandwich laminated above fibreglass layers for increased strength
- Reduced resin absorption helps lower overall weight
- 200 g woven twill rail protection resists scratches and impacts
- Strategic reinforcements strengthen key load areas
- FCS nose inserts provide secure accessory mounting

Available in: Touring

vs

• 12'6"x31" Touring Pine Tek D2 xxkg vs Starlite 14.5kg

CONSTRUCTION OVERVIEW

XTEC Carbon is a core performance construction built around Carbon Load Frame Technology, balancing weight, durability, and performance. Precision placed UD carbon controls flex and improves recoil through turns. An expanding epoxy resin system improves internal bonding, while T-Stringers and Wood Omega Stringers reinforce high-stress areas against total breakage. The result is a responsive, durable construction designed for everyday performance.

VS

→ Xtec adds the Carbon Load Frame tech with UD Carbon for improved total breakage strength and faster recoil drive.

- Carbon Load Frame Technology with UD carbon
- Expanding epoxy resin for internal bonding
- Twin T-Stringers for increased total breakage strength.
- Wood Omega Stringers deck and bottom.
- Reinforcements in standing area, fins, nose, tail, and rails

Available in: *GO, Wedge, Spice, TwinFin, Pro, TallTwin, Longboard SUP, Longboard Surf*

Carbon Reflex is our premium SUP surf construction, designed for maximum response, controlled flex, and fast recoil. It delivers a light, lively feel underfoot, reacting instantly through turns while staying strong and composed.

EPS core is wrapped with thermoformed PVC rail stringers to maintain strength without sacrificing flex. High-grade biaxial carbon fine-tunes flex and control, allowing the board to load smoothly and spring out of turns.

VS

→ Acute Carbon 25kg EPS Core, Carbon Reflex 15kg EPS Core.

→ Carbon Reflex extends Biaxial Carbon Reinforcement forwards on the deck.

→ Additional PVC Rail reinforcement is added to improve the total breakage strength on Carbon Reflex.

- Rapid recoil from 45° Biaxial Carbon full deck and bottom.
- PVC wrapped rail stringers significantly increases total breakage strength.
- Targeted standing area reinforcements
- 0.6mm Australian pine for heel durability
- Carbon reinforcements maximise strength while keeping overall weight low.

Available in: *Spice, TwinFin, Pro, TallTwin, Longboard SUP*

SOFT OUTSIDE - HARD INSIDE

- Impact-resistant high-density EVA wrapping the whole rail from nose to tail.
- Multiple layers of high-grade fiberglass are wetted out in epoxy resin wrapping the hull.
- Australian pine on the standing area for extra impact resistance and rigidity.
- Extra rigidity with the introduction of unidirectional stringer bands and solid with added rail and nose reinforcements.

Available in: *GO, Whopper, Wingboard 4-in-1*

Built to last, Rhino is the most durable and hardwearing technology designed for schools and clubs.

- The entire board is wrapped in a thick, tough thermoplastic polymer ABS skin, offering an ultra strong impact resistance and durable shell.
- The full rail is wrapped with a 0.7mm thick rail band to further protect the rails against impact.
- Full EVA deck makes it forgiving and comfortable to move around.
- A tow hole in the nose makes it easy to tow the boards and makes it easy to lock multiple boards together.

Available in: *GO, Whopper*

ALL ROUND / WAVE

GO

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

THE FRIENDLY FUN BOARD THAT MAKES ANY PADDLER FEEL PRO

The perfect beginner paddle board for first-time paddlers looking for stability, speed, and a smooth glide. Designed with a deep concave bottom and boxy rails, it offers excellent balance and effortless tracking. The range accommodates all rider weights, with wider boards for stability and narrower ones for agility. Ideal for flat water or light wind chop.

What's new?

> New Graphics on Xtec Carbon and SoHi constructions.

XTEC CARBON

11'2" x 32"	217 L	60-105 kg
10'8"x31"	192 L	55-100 kg

- ✓ Shoulder strap
- ✓ Protective rail saver
- ✓ FCS insert

SOHI

12'0"x34"	256 L	70-130 kg
11'2"x 32"	217 L	60-105 kg

- ✓ Windsurf option
- ✓ Wing option

RHINO

11'2"x 32"	217 L	60-105 kg

- ✓ Wing option

KEY FEATURES

- **STABILITY AND SPEED BALANCE**
The looks of a classic surf shape with performance and stability from our award-winning race boards.
- **WIDE TAIL AND NOSE**
provides a smooth and balanced trim for efficient and comfortable paddling over distance.
- **FLAT STANDING AREA AND CONCAVE BOTTOM SHAPE**
offer the most comfortable balance with extra stability, perfect for yoga and fitness.
- **DEEP CENTER CHANNEL AND FLAT ROCKER**
Extends the waterline for the most efficient and long-lasting glide.
- **BOXY RAILS**
Limit water flowing onto the deck to keep feet and gear dry, essential in cooler climates.
- **BUNGEE TIE DOWN**
for convenient gear storage, ensuring your essentials are secure and easily accessible during your paddle adventures.
- **FAR BACK FIN POSITION**
Improves tracking and reduces the amount of times you have to switch sides when paddling.
- **US CENTER FIN BOX**
positioned towards the middle, which gives great upwind control and improves the ease of learning Windsurfing and Wingboarding.

Available on ASAP WS and Rhino constructions.
Recommend Drake shallow 220 fin – sold separately.

ALL ROUND / WAVE

GO SURF

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

JUST GO SURF

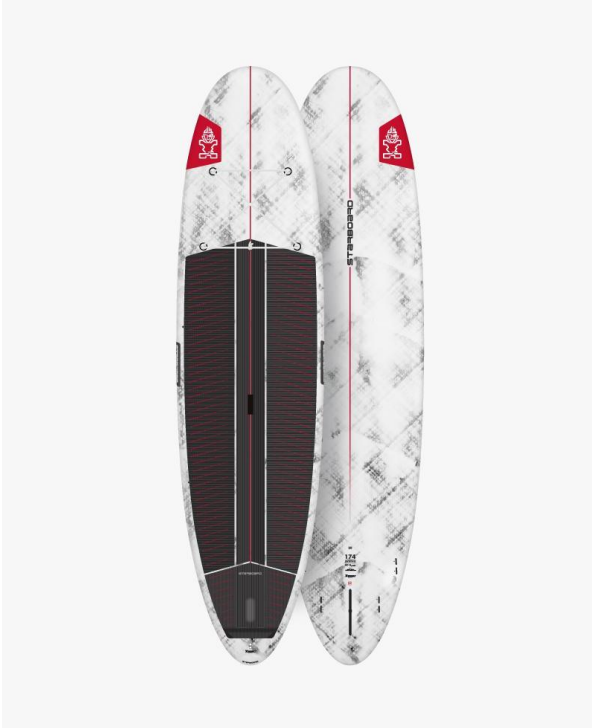

From learning in the flat to riding your first waves, the GO Surf is the next step up from our GO line. The GO Surf is ideal for those that want a simple-to-use surf model that is responsive in surf, easy to catch waves, lighter to carry, and has decent glide and stability.

What's new?

- › New Graphics
- › New **Xtec Carbon D2** construction

XTEC CARBON D2

KEY FEATURES

- **ROCKER**
Offers you good paddle speed for cruising, yet has enough kick in the nose to prevent nose diving, and a moderate tail kick to lift the nose through turns.
- **THINNER NOSE AND TAIL**
The nose and tail have thinner rails to reduce both the swing weight through turns and to give you more bite to engage the rail through turns.
- **BUNGEE INSERT**
Gear storage made easy with nose bungee tie downs. The bungee rope can be removed when surfing to freely ride the nose.
- **THE FLAT DECK**
Utilises the full width of the board, giving you a very stable standing area in choppy conditions. This flat deck makes the board feel like a wider board in stability.
- **THE RAIL**
The rail thickness is fuller in the mid-section to provide float and cruising speed.
- **VEE BOTTOM SHAPE**
Vee throughout the bottom is designed for easy rail-to-rail transitions, and turning the board from the mid point.
- **5 FIN OPTION**
2+1 offers good drive and hold through turns, while the quad offers more release and speed. Recommended to switch to a single larger fin for flat-water paddling.

10'6"x31"	174 L	50-105 kg
9'6"x31"	155 L	40-95 kg

- Lightweight construction for faster turning and improved maneuverability
- Carbon Load Frame Technology for stiffness and structural strength
- Strategic reinforcements in key impact zones for durability
- Reinforced standing area, rails, nose and tail for long-term reliability
- Optimized strength-to-weight structure balancing performance and durability

WHOPPER

MORE STABILITY, MORE WAVES, MORE FUN

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

Wide and stable size range: 33" – 36" widths.
More performance for larger riders.
Easy to learn SUP Surfing for beginners.
Fun range offering for everyone.

What's new?

- › New Graphics (except Rhino construction)
- › New **Xtec Carbon D2** constructions
- › **Special edition** in Lite Tech construction

XTEC CARBON D2

11'0"x36"	242 L	Up to 140 kg
10'0"x34"	172 L	Up to 120 kg
9'0"x33"	158 L	Up to 120 kg

SOHI

11'2"x36"	230 L	Up to 140 kg
10'0"x34"	183 L	Up to 120 kg
9'5"x33"	166 L	Up to 110 kg

RHINO

10'0"x34"	168 L	Up to 120 kg
-----------	-------	--------------

LITE TECH

10'0"x34"	168 L	Up to 120 kg
-----------	-------	--------------

KEY FEATURES

- **BEVELLED RAILS**
Inspired by the Spice, the soft bevelled rails help to roll smoothly into turns despite the width of the board. The bevel also creates a thinner pinched apex that requires less foot pressure to turn.
- **THIN TAIL**
The thinner tail requires less foot pressure to turn the board, giving you more control and response to make turns
- **5 FIN SETUP**
All three sizes features a 5-fin setup, providing the flexibility to customise your riding style with options for both 4+1 and 2+1 fin options.
Except SoHi and Rhino constructions are 2+1 set up.
- **WING TAIL**
Blends comfort and performance. Learners have comfort from the wider outline in front of the wing; while advanced, heavier riders can unlock greater manoeuvrability behind the wing.
- **NARROWER NOSE OUTLINE**
Allows you to paddle faster and straighter, minimising paddle contact on the nose. Both the narrower and thinner nose rails reduce catching during turns.
- **BOARD SOCK INCLUDED**
Reduces paper waste and protects your board from dust, scratches, and UV damage. Made of stretchable polyester, it fits various board shapes and has a secure drawstring closure.

SURF

WEDGE

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

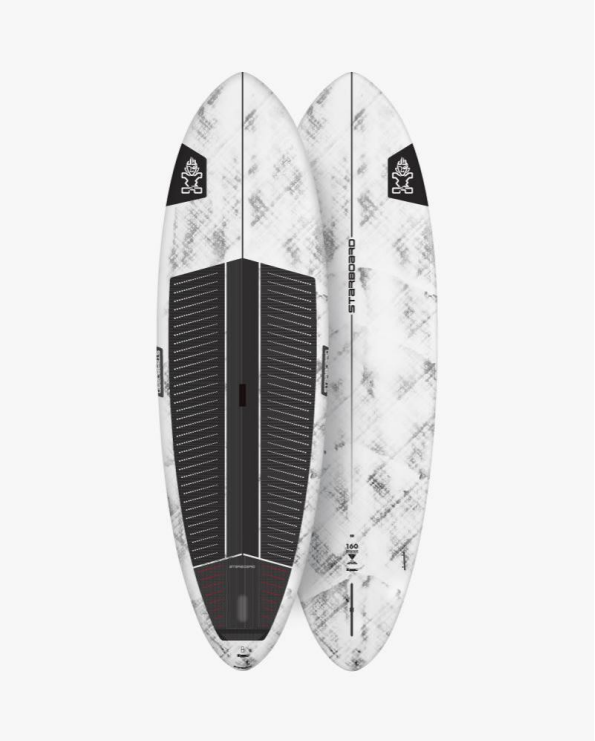

THE NEW EDGE

Versatile surf shape is performs in both big and small conditions.
Best suited for beginner and intermediate riders.
Performance without compromising stability.

What's new?
› New Graphics

XTEC CARBON

KEY FEATURES

- **NARROW NOSE WITH LOW ROCKER**
The narrow nose outline allows you to generate more speed on the wave and makes it easier to turn without catching the nose. Low nose rocker helps you get into waves easily and early.
- **ROUNDED PIN TAIL**
The Wedge has a rounded pin tail to maximize turning ability in these wider models. It makes the board very lively and responsive to maneuver, allowing you to have full control when stepping back to turn.
- **FIN SETUP**
2+1 fin setup provides comfortable straight-line tracking on flat and gives drive and control in surf.
4+1 fin setup uses 4 side fins and gives fast acceleration and instant down the line speed as it does not have a drag from the larger centre fin.
*9'2" only 2+1.
8'7" features 4+1 and 2+1 setup.*
- **THIN RAIL PROFILE**
The thin rails define turning performance, easier for you to turn on rail with less effort creating an amazing feel of response. The thin rails are inspired from the much loved Longboard range for the ultra responsive and reactive feel.
- **BOTTOM SHAPE**
Generates lift, drive and speed as it channels the water from nose to tail, through to double concave for sensitive rail to rail turning from the mid point, through to vee tail for reactive pivot turning on the tail.
- **BOARD SOCK INCLUDED**
Reduces paper waste and protects your board from dust, scratches, and UV damage. Made of stretchable polyester, it fits various board shapes and has a secure drawstring closure.

7'4"x27"	90 L	65-80 kg
6'9"x25.5"	79 L	55-75 kg
6'9"x24.5"	73 L	45-70 kg

XTEC CARBON

10'3"x32.75"	174 L	100-140 kg
9'3"x32.75"	153 L	100-130 kg
8'8"x32"	140 L	95-115 kg
8'2"x30.75"	121 L	80-95 kg
7'11"x29"	106 L	70-90 kg
7'4"x27"	90 L	65-80 kg

KEY FEATURES

- **BEVELLED RAIL**
Features three key benefits: It reduces planing area, boosting speed and acceleration. The bevel angle enables effortless rail-to-rail transitions, enhancing responsiveness for pumping and carving. The thinner, pinched rail demands less foot pressure to initiate turns.
- **WING TAIL**
The Wing tail creates a break in the rail line, giving stability from the extra width forwards, while narrowing behind the wing for better control and response. The rails are kept thin at the tail for more manoeuvrability.
- **FIVE FIN OPTION**
Allows for 4+1 and 2+1 fin setups. Choose based on your riding style and wave conditions. Updated fin angles offer more front splay for maneuverability and less rear angle for drive.
All models include a 4+1 setup with 4.7 front and 4.5 rear fins, except the 10'3", which has a thruster setup with a 170 center and 4.7 front fins.
- **NOSE OUTLINE**
Provides stability and extends the rail line for faster speed. Thin tapered rail profile helps reduce swing weight from the nose to enhance manoeuvrability and speed through turns.
- **PARALLEL AND THICK MIDSECTION**
Parallel outline helps engage the rail for good speed down the line while thicker midsection provides float and carries speed down the line and momentum through smaller surf.
- **SLIGHT DOMED DECK**
Helps keep rails thin for response yet gives enough float in the centre buoyancy of the board.
- **ROUND PIN TAIL**
Offers good drive out of turns and holds well in bigger surf.
- **CARBON SURF FIN**
Ultra-light carbon surf fins will enhance your performance in the waves, providing more drive, stronger grip, and faster speed out of turns.
Comes only with a Carbon Reflex board.
Xtex boards come with Armacore fins.

SURF

TWINFIN

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

FAST LINES, FREE SLIDES

Ultimate speed & flow.
Effortless turns & looser feel.
Versatility across wave sizes.

What's new?
› New Graphics

TWINFIN **VS** SPICE **VS** PRO

The Twin is best for smaller, weaker waves, letting intermediate surfers perform more radically with less technique. It stays lively throughout the wave, generating easy speed and quick recoveries. Despite its small-wave focus, it can handle well overhead surf, pumping off the bottom and racing sections. Compared to the Spice and Pro, the Twin is looser and unlocks speed faster. The Pro remains the high-performance choice in bigger, critical conditions, delivering top hold and control. The Spice offers versatility with quad or thruster setups, plus bevel rails for smooth rail-to-rail transitions and added hold. The Twin complements but doesn't replace either, appealing to those seeking relaxed lines, high-speed arcs, and tail slide turns.

FULL TWINFIN WHITE PAPER →

KEY FEATURES

- **PRONOUNCED HIP & MOON TAIL**
A subtle break behind the fins narrows the tail for crisp pivots, delivering a loose yet controlled feel for snappier turns.
- **FINE RAILS TO THE TAIL**
Boosts responsiveness and agility. Fuller nose rails help drive down the line, while thinner nose rails cut swing weight for faster rotations.
- **TWINZ FIN SETUP**
Two large fins minimize drag for faster rides, giving both solid hold and easy tail release. Add a nubster fin for extra control and bite in bigger surf.
- **CHANNEL TAIL RELEASE**
Generates lift and extra speed while broadening the sweet spot for both front- and back-foot surfers, aiding recovery and maneuver setups.
- **DOMED OR FLATTER DECKS**
Smaller sizes feature a domed deck for sensitivity and thinner rails, while wider models have a flatter deck for added stability and comfort.
- **ALL-LEVEL VERSATILITY**
Excels in small waves for easy speed and flow, yet retains enough bite to handle well-overhead conditions with confidence and style.

SURF TALLTWIN

N

TWO STYLES. ONE FLOW

NEW

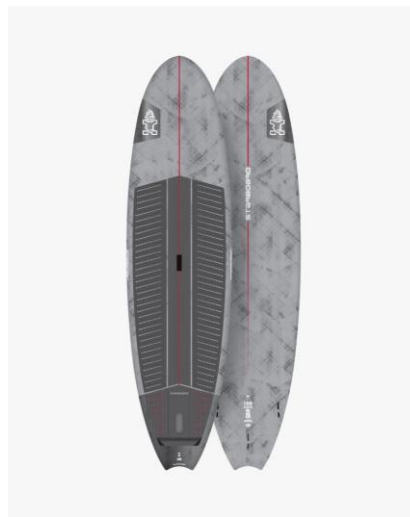

1st order: March 2026
1st shipment: May 2026
Public Release: June 2026

All-new performance longboard concept
Twinfin-inspired tail replacing traditional 2+1 setup
Twinz side fins for reduced drag and faster acceleration

Looser tail feel with easier release through turns
Glide and nose-riding ability retained with added speed
Designed to complement, not replace, the traditional Longboard

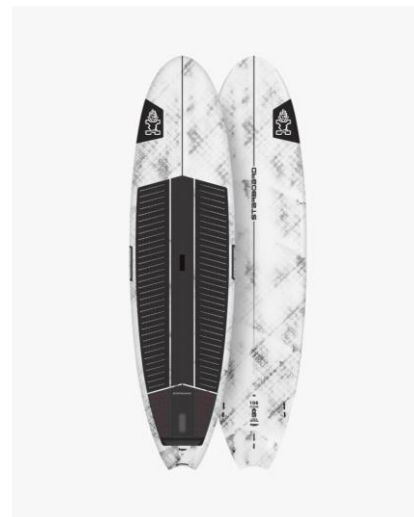

CARBON REFLEX

NEW 9'8"x30.5"	145 L	Up to 120 kg
NEW 9'5"x29.75"	132 L	Up to 100 kg
NEW 9'0"x27.5"	108 L	Up to 90 kg
NEW 9'0"x25.5"	94 L	Up to 85 kg

XTEC CARBON

NEW 9'8"x30.5"	145 L	Up to 120 kg
NEW 9'5"x29.75"	132 L	Up to 100 kg
NEW 9'0"x27.5"	108 L	Up to 90 kg

KEY FEATURES

- **TWINFIN SPEED, LONGBOARD FLOW**
Combines TwinFin acceleration and release with longboard glide, trim, and nose-riding stability in one progressive platform.
- **LONGBOARD LENGTH AND NOSE OUTLINE**
Provides glide, stable trim, smooth cross stepping, and confident nose riding, even in softer or slower waves.
- **VEE THROUGH THE TAIL**
Helps the board roll rail to rail, making turns easier to initiate and smoother to link on a longer board.
- **TWINZ FIN SETUP**
Two large side fins reduce drag for higher top speed, strong hold, and controlled tail release through turns.
- **MODERN PERFORMANCE LONGBOARD**
Looser tail, reduced drag, and faster acceleration deliver a more dynamic and responsive feel than a traditional 2+1 setup.
- **TWINFIN INSPIRED TAIL SHAPE**
Creates a faster, looser feel with earlier release, allowing tighter arcs and a more dynamic turning style.
- **CENTRAL CHANNEL BOTTOM**
Generates lift and speed while adding natural tracking, reducing the need for a large centre fin and keeping the board fast and free.
- **OPTIONAL CENTRE NUBSTER**
Adds extra grip and stability for bigger surf, heavier riders, or those wanting more control when turning or nose riding.
- **DESIGNED TO EXPAND YOUR STYLE**
Built for intermediate to advanced riders seeking more speed, freedom, and expression without sacrificing glide or nose time.
- **PRONOUNCED HIP AND MOON TAIL**
Narrows the tail behind the fins for quicker pivots, easier direction changes, and more responsive turning.
- **FLATTER ENTRY TO THE NOSE**
Maintains glide and stability when trimming forward, helping the board carry speed and stay composed on the nose.
- **QUIVER EXPANDING DESIGN**
Offers a faster, looser alternative to a traditional longboard for riders seeking more speed, freer turns, and less drag in similar conditions.

The TallTwin claims its first triple crown at Bali LSR 2026:

- 🏆 Zane Schweitzer – Elite men
- 🏆 Ke'ale Dorries – Elite women
- 🏆 Pete Cox – Weekend Warriors

SURF

PRO

NEW

1st order: March 2026
1st shipment: May 2026
Public Release: July 2026

SURF LIKE A PRO

World-class performance SUP wave model.
The most advanced and manoeuvrable SUP surf range.
Achieved multiple World Championship titles.

What's new?

- › Narrower pin tail for stronger hold and increased drive
- › Longer, narrower outline for improved down-the-line speed
- › Thinner tail rails for sharper response and tighter arcs
- › Refined volume distribution for better paddle power and balance
- › Increased control on late drops and in critical sections

CARBON REFLEX

NEW 9'2"x29.75"	144 L	Up to 120 kg
NEW 8'9"x29.25"	133 L	Up to 110 kg
NEW 8'6"x28.75"	121 L	Up to 105 kg
NEW 8'0"x27.75"	106 L	Up to 95 kg
NEW 7'8"x26.25"	95L	Up to 90 kg
NEW 7'6"x24.5"	87 L	Up to 80 kg
NEW 7'3"x23"	75 L	Up to 70 kg

XTEC CARBON

NEW 9'2"x29.75"	144 L	Up to 120 kg
NEW 8'9"x29.25"	133 L	Up to 110 kg
NEW 8'6"x28.75"	121 L	Up to 105 kg
NEW 8'0"x27.75"	106 L	Up to 95 kg

KEY FEATURES

- **THIN PERFORMANCE RAILS**
Delivers precise control and strong grip through turns, with added bite in high-energy conditions.
- **BUILT FOR POWERFUL WAVES**
A narrower pin tail, refined rails, and longer outline provide strong hold, drive, and control in steep, fast, and critical sections.
- **TOTAL CONFIDENCE WHEN IT COUNTS**
Designed for committed riders who want one board they can rely on from everyday surf to bigger, more serious waves.
- **NARROW PIN TAIL**
Increases hold, drive, and control in steep, fast, and powerful waves, including critical sections and barrel riding.
- **LONGER, NARROWER OUTLINE**
Enhances down-the-line speed and stability, allowing confident entry into faster wave faces.
- **SINGLE TO DOUBLE CONCAVE BOTTOM**
Generates lift and speed through the midsection, transitioning to control and rail-to-rail responsiveness.
- **FORWARD VOLUME DISTRIBUTION**
Maintains paddle power and stability while allowing the tail to stay refined and responsive.
- **SLIGHT VEE THROUGH THE TAIL**
Aids smooth transitions and controlled carving, especially at higher speeds.
- **FIVE FIN SETUP**
Supports 4+1 and 2+1 configurations, allowing riders to tune drive, hold, and looseness for conditions and style.
- **MODERATE PERFORMANCE ROCKER**
Prevents nose catching on steep drops while maintaining speed and control through turns.
- **LOCKED-IN PERFORMANCE FEEL**
Designed for committed surfing, delivering confidence, predictability, and control when conditions get serious.

SURF

LONGBOARD SUP

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

UNDISPUTED AS THE MOST SUCCESSFUL AWARD-WINNING LONGBOARD SUP

More reactive and controlled performance.
Faster and forgiving nose riding.
Thin, performance rails.
3 x Bali Longboard SUP Revolution Champion.

CARBON REFLEX

XTEC CARBON

10'0"x31"	151 L	50-110 kg
10'0"x29"	133 L	45-100 kg
9'5"x30"	124 L	45-100 kg
9'0"x28"	105 L	45-90 kg
9'0"x26"	92 L	45-85 kg

10'0"x31"	151 L	50-110 kg
10'0"x29"	133 L	45-100 kg
9'5"x30"	124 L	45-100 kg
9'0"x28"	105 L	45-90 kg

KEY FEATURES

- **THIN RAILS**
The thin rails offer greater control and responsiveness during maneuvers. In the nose, they help grip the wave face while nose riding, and in the tail, they require less effort to turn.
- **ROCKER CURVE**
A moderate nose kick prevents catching in turns yet carries speed when nose riding, while the tail kick unlocks high-performance surfing, delivering snappy performance when riding on the tail.
- **FINS**
With a unique 5-degree fin angle, the fin setup offers playful performance and excellent drive on the wave.
Carbon Reflex comes with Prepreg Carbon fins.
Xtec comes with Armacore fins.
- **SLIGHT DOMED DECK**
The volume is fuller in the middle of the board to compensate for the thin rails, while maintaining a moderately flat standing area for comfort and stability.
- **BOTTOM SHAPE**
A slight nose concave delivers speed riding toes on the nose, merging into a double concave midsection for rail-to-rail turns, and ending with a vee tail for snappy maneuvers. The new shape enhances flow and feels forgiving in the process.
- **OUTLINE SHAPE**
The nose outline keeps enough width for control and stability when nose riding, while being forgiving to limit catching when rotating through turns. The midsection is fairly parallel for down-the-line speed, while the pulled-in tail pivots the board through maneuvers.

SURF

LONGBOARD SURF

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

CLASSIC SURF DESIGN MEETS NEW ULTRA-LIGHTWEIGHT CONSTRUCTION

Performance Surfboard.
Modern-day lightweight technology with a classic old-school longboard feel.

What's new?
› New Graphics

CARBON REFLEX SANDWICH

9'3"x22.5"	65 L	-
9'1"x22"	59 L	-

XTEC CARBON

9'3"x22.5"	65 L	-
9'1"x22"	59 L	-

KEY FEATURES

- **BOTTOM SHAPE**
A slight nose concave quickly feeds into a double concave for stable yet fast nose riding. The double concave deepens through the midsection, loosening up for rail-to-rail transitions and funnelling the water to a flat vee out of the tail for radical turns.
- **RAILS**
Thin nose rails lock in for nose riding and reduce swing weight in turns. Round, fuller midsection rails carry speed in small and big surf. Rails taper towards the tail for maximum grip and responsive, snappy turns, unlocking high-performance.
- **FIN SET UP**
Both models feature a 2+1 fin setup. FCS 2 side fin boxes at a 5-degree angle provide lift and control, complemented by a 10" US center box for stability. Use the 2+1 setup for performance longboard surfing, or switch to a larger single fin for classic longboard riding.
**Fins sold separately.*

- **OUTLINE**
The nose outline maintains width for stability during nose riding and forgiveness during turns. The parallel midsection maximizes down-the-line speed, while the pulled-in tail enhances maneuverability. The 9'1" features a diamond tail, while the 9'3" has a rounded pin tail.
- **2 PERFORMANCE SIZES**
The 9'3"x22.5" Longboard offers a loose feel in turns with powerful control on the lip, aided by its v-concave midsection for speed and a nose single concave for stable hanging ten.

The 9'1"x22" Longboard excels in 1ft to 6ft waves, delivering fast down-the-line surfing and powerful, loose turns off the wave's crest.
- **BOARD SOCK INCLUDED**
Reduces paper waste and protects your board from dust, scratches, and UV damage. Made of stretchable polyester, it fits various board shapes and has a secure drawstring closure.

RACE

ALL STAR

ONE BOARD, ALL CONDITIONS

World's champions racing board.
The board of choice for all conditions, and is the most versatile race design.

1st order: July 2026
1st shipment: September 2026
Public Release: December 2026

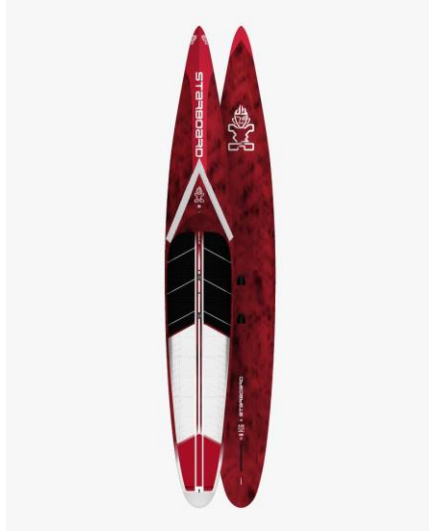

What's new?

› New constructions **Carbon Reflex Sandwich D2** and **Xtec Carbon D2**

CARBON REFLEX SANDWICH D2

XTEC CARBON D2

NEW 14'0"x24.5"	325 L	TBC
NEW 14'0"x23"	292 L	TBC
NEW 14'0"x21.5"	276 L	TBC
NEW 14'0"x20.5"	276 L	TBC

NEW 14'0"x26"	330 L	TBC
NEW 14'0"x24.5"	325 L	TBC
NEW 14'0"x23"	292 L	TBC

D2 technology optimizes the internal structure to reduce weight while maintaining a strong, impact-resistant outer shell. Strategic reinforcements are positioned in key load areas to maintain durability and reliability in demanding race conditions.

KEY FEATURES

- **HYBRID DUGOUT DESIGN**
Gives the best of both worlds – dugout in the standing, flat deck at the tail.
- **ROUNDER RAILS IN THE NOSE**
more forgiving and easier to handle in side chop / wind conditions.
- **SCUPPER CENTER DRAINAGE**
Scupper drainage systems are integrated into the board, featuring a much larger drainage opening for faster drainage.
- **10" FIN BOX**
The 10" fin box gives riders flexibility to adjust their fin depending on race style. Short course racing would benefit from a fin further forward for fast turning, while longer races suit a fin further back in the box. Box placement varies for downwinding as some riders may prefer less or more tracking when surfing bumps.
- **VEE BOTTOM**
Has proven to be the fastest and most efficient shape, delivering excellent control in both flatwater and surf. The Vee tail also improves release for smoother, cleaner acceleration.
- **THINNER PROFILE**
Lower volume from the thinner profile reduces overall weight and has less wind resistance in side chop.
- **FLAT OPEN TAIL DESIGN**
creates a wider standing area, giving more space for additional stability and control, when buoy turning, downwinding and surfing. The open tail improves drainage speed, flushing out water quickly and efficiently, reducing added water weight in the standing area.
- **MULTIPLE HANDLE POSITIONS**
The All Star is the technical/beach race specialist. Handles are modular with our screw in system to fine tune handle positioning.
- **EVA RACE DEFLECTOR**
Designed for larger ocean chop, the deflector diverts water from entering the standing area.

[FULL ALL STAR WHITE PAPER →](#)

RACE

SPRINT ZERO

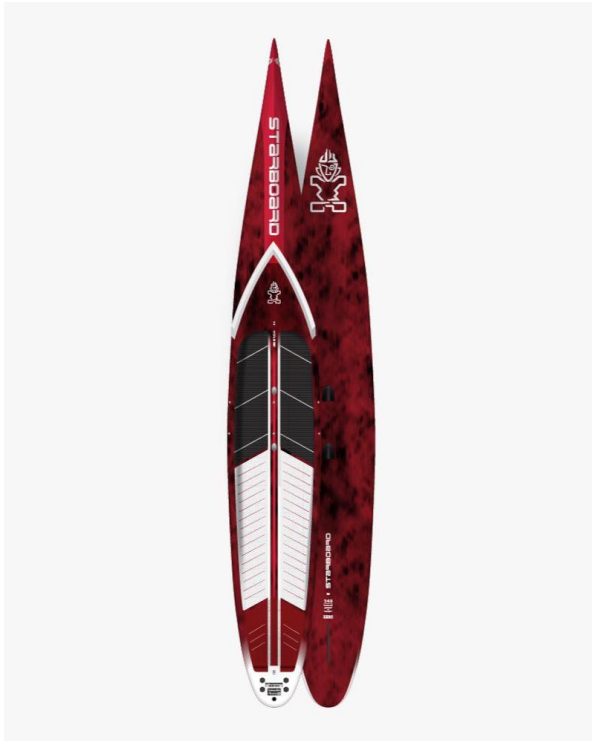

1st order: July 2026
1st shipment: September 2026
Public Release: December 2026

THE FASTEST GOT EVEN FASTER

Less wash and smoother release.
More stability – allows more power forwards, more comfortable stance.
Volume refinements reduce the overall weight.
Lower and thinner tail means more control when stepping back to turn.

ZERO

14'0"x23.5"	248 L	Up to 90kg
14'0"x21.5"	240 L	Up to 80kg

KEY FEATURES

- **THIN SLICING NOSE**
The ultra-thin nose slices through flatwater conditions and is the most efficient design.
- **STREAMLINE OUTLINE**
With a more parallel outline than our previous sprint model, the sprint achieves faster speeds and vastly improved stability.
- **ROUND TAIL**
Our most efficient tail design ever reduces wash and improves glide.
- **ROUND HULL DESIGN**
Our fastest and most efficient hull design ever has been digitally designed to give the most efficient glide, and tested in the real world in various flat and semi-flat conditions. This hull allows the board to maintain higher speeds over a longer distance.
- **WIDE POINT FURTHER FORWARDS**
The inner walls in the Sprint have been shaped for maximum standing area width for comfort, stability and control.
- **VOLUME REDUCTION**
The front of the cockpit has been reduced in volume where possible, to achieve a lighter and more open design.
- **FLAT TAIL ANGLE**
Comfortable in kick turns and when standing further back, the volume and slope has been reduced at the back of the standing area to achieve a lighter and more comfortable board.
- **RECESSED CARBON SCUPPER SYSTEM**
Carbon scuppers sit flat on the bottom of the Sprint, resulting in an even more efficient hull flow. The carbon scupper system is recessed into the board and features a larger hole for even faster water flow from the deck.
- **10" FIN BOX**
The 10" fin box gives riders flexibility to adjust their fin depending on race style. Short course racing would benefit from a fin further forward for fast turning, while longer races suit a fin further back in the box.
- **EVA RACE DEFLECTOR**
Designed for larger ocean chop, the deflector diverts water from entering the standing area.

RACE

GEN R

A NEW GENERATION OF RACING

Drawing on the award-winning performance of the All Star and the renowned efficiency of the Sprint, the Gen R refines a versatile flat deck design that manages more challenging conditions while maintaining speed and stability on flats.

The Gen R proves itself with faster upwind performance, easier control downwind and in side chop, and the same proven efficiency on the flats.

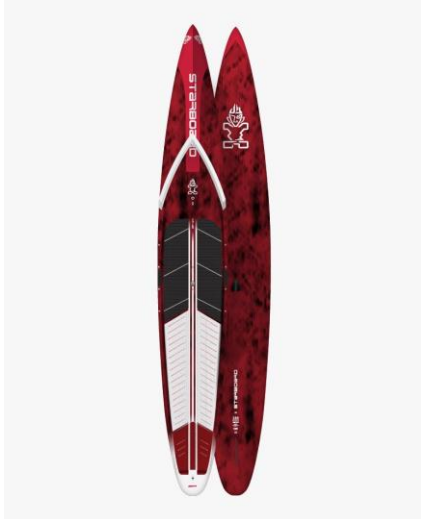

1st order: July 2026
1st shipment: September 2026
Public Release: December 2026

What's new?

- › New Graphics
- › New **Carbon Reflex Sandwich D2** and **Xtec Carbon D2** constructions

CARBON REFLEX SANDWICH D2

14'0"x25"	288 L	Up to 105kg
14'0"x23"	270 L	Up to 95kg
14'0"x21.5"	256 L	Up to 85kg

XTEC CARBON D2

14'0"x27"	304 L	Up to 110kg
14'0"x25"	288 L	Up to 105kg

LITE TECH

14'0"x25"	288 L	Up to 95 kg

KEY FEATURES

- **RAILS**
The round rails on toward the nose rails give control and tracking in the side wind, offering the perfect balance of control and balance.
- **LOW STANDING AREA**
The new Gen-R features a 1.5cm lower standing area than its predecessor. This slight drop results in a lower center of gravity for the rider, improving overall stability and control.
- **RECESSED EVA HANDLE**
1cm EVA Recessed handle gives a soft and forgiving grip during beach starts or when carrying the board. This handle is especially useful during running beach starts.
- **THIN AND LIGHT DESIGN**
The new Gen-R is thinner than its predecessor with less volume, making it lighter, faster and more nimble, particularly in side winds or during beach starts.
- **ROCKERLINE**
A blend of the previous Gen-R toward the nose, combined with the All Star toward the back of the board. Great control in rough conditions while offering amazing acceleration in flatwater.
- **NOSE VEE**
Designed to help shed water off the deck and improve the board's handling in chop and waves and enhancing the "pop" in choppy conditions.
- **EXTENDED STANDING AREA**
The standing area on the new Gen-R has been extended further forwards for easy stance trimming in sprints and downwind.

[FULL GEN R WHITE PAPER →](#)

D2 technology optimizes the internal structure to reduce weight while maintaining a strong, impact-resistant outer shell. Strategic reinforcements are positioned in key load areas to maintain durability and reliability in demanding race conditions.

RACE

KATANA

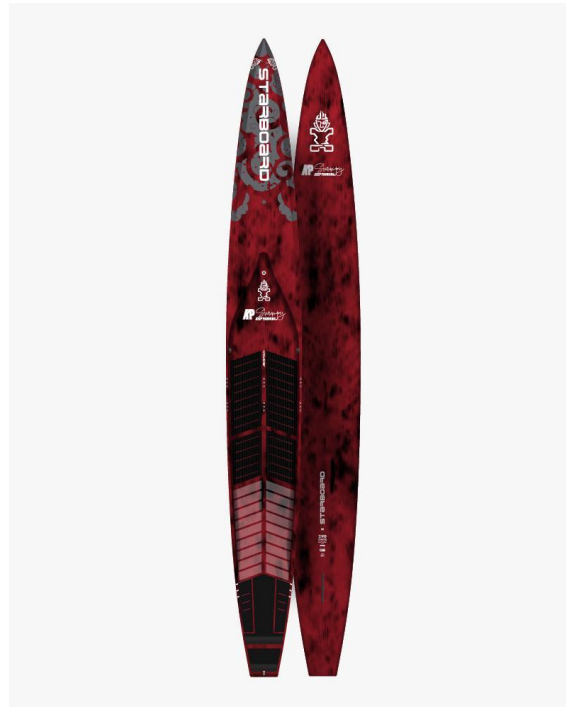

SPEED THROUGH CADENCE

All-new race model designed and raced by multiple ISA and ICF World Champion Shuri Araki. Developed around a high-cadence paddling technique, prioritizing rhythm, efficiency and precision. Introduces the narrow Box Tail™ design for improved glide and cadence-driven acceleration. Represents a new racing philosophy, focused on speed through cadence rather than brute-force power. Sits between the Gen R and All Star in the race lineup, offering a unique paddling feel and performance style.

1st order: July 2026
1st shipment: September 2026
Public Release: December 2026

CARBON REFLEX SANDWICH D2

D2 technology optimizes the internal structure to reduce weight while maintaining a strong, impact-resistant outer shell. Strategic reinforcements are positioned in key load areas to maintain durability and reliability in demanding race conditions.

NEW 14'0"x20.5"	290 L	
-----------------	-------	--

KEY FEATURES

- **NARROW BOX TAIL™**
Patented design by Takuji Araki
A unique tail design that lifts and accelerates the board forward, enabling efficient pumping while maintaining strong straight-line stability.
- **REARWARD STANDING POSITION**
Standing area positioned further back to optimise trim and fully engage the Box Tail™, helping generate forward propulsion.
- **VERY HARD TAIL RAIL EDGES**
Patented design by Takuji Araki
Sharp rail edges at the tail act like additional fins, improving tracking and reducing reliance on the main fin.
- **SHARP PIERCING NOSE**
Inspired by the Katana sword, the sharp nose slices through water and chop, maintaining speed and control at high cadence.
- **DUGOUT DESIGN**
The dugout lowers the center of gravity, increasing stability and improving control in choppy open-water conditions.
- **DUAL SIDE DRAINAGE HOLES**
Drainage holes quickly evacuate water from the deck, allowing rapid recovery in technical and choppy conditions.
- **REFINED ROCKER PROFILE**
Slightly lower nose and tail rocker than the All Star, combined with added vee to maintain glide and maneuverability.
- **PARALLEL SPEED OUTLINE**
Parallel mid-section improves stability and glide, while the narrow nose and tail increase speed and paddling efficiency.
- **MULTI-STAGE VEE BOTTOM**
Rounded vee nose helps glide into bumps. Vee mid-section with slight double concave improves tracking, while progressive vee tail aids buoy turns and maneuvering.

RACE

TSURUGI

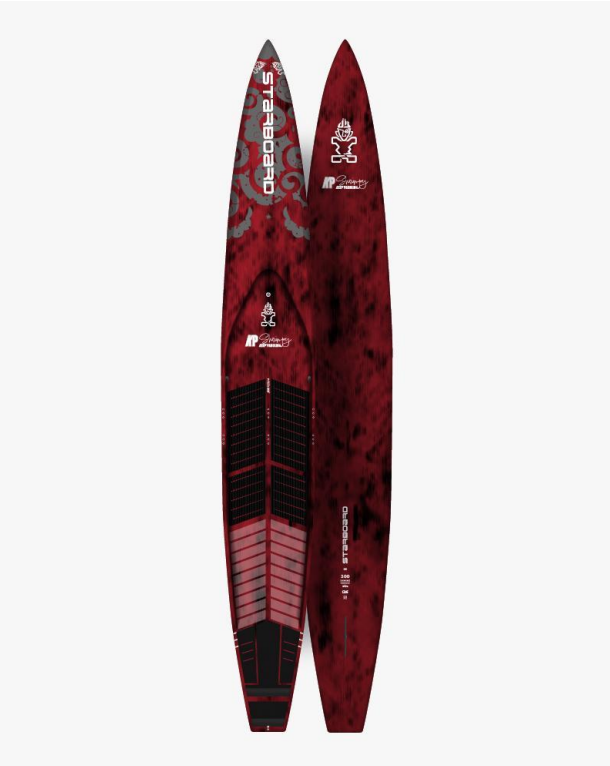

PRECISION SPEED. MORE CONTROL.

The Tsurugi brings the high-cadence racing philosophy of the Katana to a more forgiving race platform. Designed with slightly less nose/tail volume for added control, it maintains efficient glide and fast acceleration while offering a smoother, more balanced ride for intermediate paddlers and heavier riders.

ADVENTURE

TOURING

FAST, SMOOTH AND STABLE

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

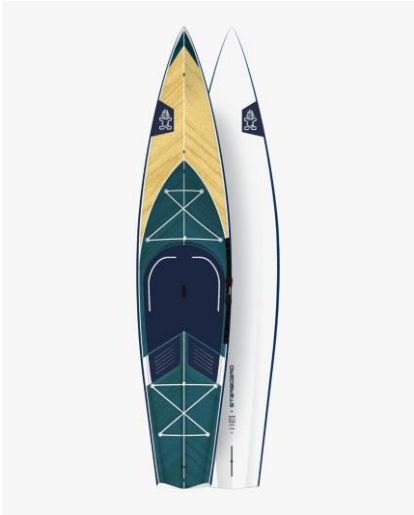

Adventure-ready right out of the box.
Fast, efficient glide for covering distance.
Gear accessibility and lower center of gravity for stability.

What's new?

- › New Graphics
- › New **Pinetec D2** and **Xtec Carbon D2** constructions

PINETEC D2

14'0"x30"	298 L	60-120 kg
12'6"x31"	279 L	50-110 kg

- ✓ Shoulder strap
- ✓ Front bungee
- ✓ Rear bungee

XTEC CARBON D2

14'0"x30"	298 L	60-120 kg
12'6"x31"	279 L	50-110 kg

- ✓ Shoulder strap
- ✓ Front bungee

KEY FEATURES

- **THIN SHARP SLICING NOSE**
Inspired by our fastest racing board the Sprint, the taller squarer nose profile limits it diving in chop and reduces splashing, providing a silent and smooth glide. The slightly narrower nose outline at the tip has a cleaner entry for a faster glide and improved efficiency.
- **SWEPT BACK FIN**
For greater straight line tracking
- **ANGLED NOSE RAIL EDGE** - Restricts water wrapping the nose for more efficient paddling with less drag.
- **BOXY RAILS WITH CHAMFERED EDGE**
Reduces the board from rolling and water entering on the deck. Chamfered rail edge increases speed and stability.
- **FLAT TAIL AND SIDE PLANES**
Creates a cleaner and smoother release, reducing tail wake and increasing glide efficiency. Flat side planes greatly increases overall control and stability.
- **SPECIAL BAG STORAGE**
A specially designed secure bag storage, positioned conveniently in front of the standing area, not only enhances accessibility but also lowers the centre of gravity, providing heightened control and stability for gear transportation.
- **RECESSED DRAINAGE CHANNEL**
Helps guide any water in the standing area to flush out quickly at the tail.
- **DEEPER RECESSED STANDING** - Increases your stability and control.
- **STRAIGHT AND DEEP CHANNEL**
Improves straight-line tracking, allowing you to paddle straighter on one side for longer. Deep center channel funnels water smoothly from nose to tail generating lift and speed.
- **LOW NOSE ROCKER**
Extends the waterline for a smoother and faster glide optimized for flat-water cruising.

ADVENTURE

GENERATION

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

GENERATIONS AHEAD OF THE REST

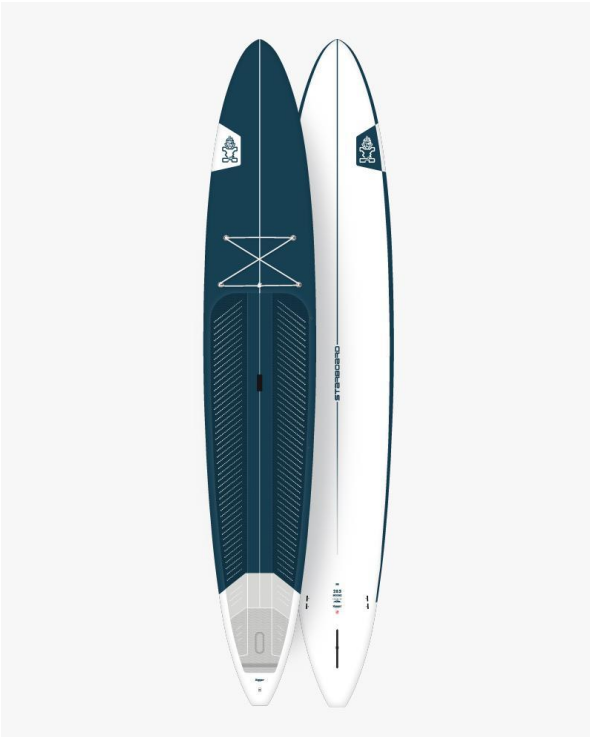

3-in-1: A true one-board quiver - Surfing, Racing, Touring
Range is great for progression
Gear of the Year by SUPConnect 2025, 2023, 2021

What's new?

- › New Graphics
- › New **Xtec Carbon D2** construction

XTEC CARBON D2

14'0"x30"	310 L	50-120 kg
14'0"x28"	285 L	50-110 kg
14'0"x26"	265 L	45-100 kg
12'6"x30"	272 L	55-110 kg
12'6"x28"	249 L	50-100 kg

KEY FEATURES

- **ROUND VEE BOTTOM SHAPE**
Helps lift the board so you can accelerate faster and maintain a higher top speed. It also floats over chop smoothly, making it versatile to handle all conditions. Deep double concave supports the round Vee with stability directly under foot.
- **RAIL THICKNESS**
Maintained throughout the entire profile of the board, giving you a balanced glide from nose to tail. The Generation is thinner than a Touring and Race board, making it lighter to manoeuvre and easier to carry.
- **GRADUAL NOSE KICK**
Helps stop the board from diving in the surf and downwind, as well as lifting over chop upwind. The curved rocker is fast on flats, smooth in the surf and very capable in chop.
- **BUNGEE TIE DOWN**
Directly in front of the standing area make it convenient and accessible for you to store any gear when touring and cruising.
- **RAIL TUCK EDGE**
The rails are round to avoid you catching the nose, sharpening at the middle to create a stable platform, through to sharp edge at the tail to carve in surf.
- **RECESSED PAD**
Lowers your center of gravity for greater comfort and stability. The flat deck makes it easy for you to move freely around when trimming the board and surfing on the tail.
- **FIN SET UP**
Provides good straight-line tracking and is easy to buoy turn when racing. A thruster set-up with the 5.5" side fins proved the best combination for added drive and control so you can turn the board with ease in the surf.
- **2-IN-1 SHOULDER CARRY STRAP**
Making it effortless to carry the board to the water and allowing you to fix your paddle when you don't need it.
Sold separately.

ADVENTURE

ROAMER

NEW

1st order: April 2026
1st shipment: June 2026
Public Release: June 2026

THE PERFORMANCE EXPLORER

The Roamer is built for those who dream of going further. Inspired by Starboard's race-winning All Star DNA and developed with expedition paddler Bruce Kirkby, it combines speed and efficiency with the stability, capacity, and seaworthiness needed for real exploration.

XTEC CARBON D2

14'0"x28.5"

324 L

[FULL ROAMER WHITE PAPER →](#)

KEY FEATURES

- **THIN SHARP SLICING NOSE**
Inspired by our fastest racing board the Sprint, the taller squarer nose profile limits it diving in chop and reduces splashing, providing a silent and smooth glide. The slightly narrower nose outline at the tip has a cleaner entry for a faster glide and improved efficiency.
- **SWEPT BACK FIN**
For greater straight line tracking
- **ANGLED NOSE RAIL EDGE** - Restricts water wrapping the nose for more efficient paddling with less drag.
- **BOXY RAILS WITH CHAMFERED EDGE**
Reduces the board from rolling and water entering on the deck. Chamfered rail edge increases speed and stability.
- **FLAT TAIL AND SIDE PLANES**
Creates a cleaner and smoother release, reducing tail wake and increasing glide efficiency. Flat side planes greatly increases overall control and stability.
- **SPECIAL BAG STORAGE**
A specially designed secure bag storage, positioned conveniently in front of the standing area, not only enhances accessibility but also lowers the centre of gravity, providing heightened control and stability for gear transportation.
- **RECESSED DRAINAGE CHANNEL**
Helps guide any water in the standing area to flush out quickly at the tail.
- **DEEPER RECESSED STANDING** - Increases your stability and control.
- **STRAIGHT AND DEEP CHANNEL**
Improves straight-line tracking, allowing you to paddle straighter on one side for longer. Deep center channel funnels water smoothly from nose to tail generating lift and speed.
- **LOW NOSE ROCKER**
Extends the waterline for a smoother and faster glide optimized for flat-water cruising.

CROSSOVER

WINGBOARD 4-in-1

1st order: May 2026
1st shipment: June 2026
Public Release: September 2026

SUP – WINDSURF – WING BOARD – WING PADDLING

This board is designed and tested for wingboarding, and is at the same time a fabulous 10'4" x 32" GO paddle board. As a windsurfing board, it's easy to learn on and you will enjoy an amazing glide in lighter winds. The length provides the glide and ability to stay upwind. The thick rails, concave bottom and overall volume make it super stable.

ASAP

10'4"x32"	220 L	45-105 kg
-----------	-------	-----------

KEY FEATURES

- **WIDE TAIL AND NOSE**
Provides an entirely smooth and balanced trim for efficient paddling over distance. You can step back for a snap turn or count on the nose area for added stability in chop.
- **THE BOXY RAILS**
Increase the stability of the board and limits water flowing onto the deck, keeping feet and gear dry, essential in cooler climates.
- **CENTER TUTTLE BOX**
This board is fitted with a centre Tuttle box (Drake Shallow), in the middle of the board.
This centre fin helps prevent drifting downwind when windsurfing and wing-boarding. It gives you the traction you need to glide forward when powered.
- **MAST TRACK**
A mast track with easy adjustability, so one can position smaller rigs further back and larger rigs forward, creating the right balance and center of effort when enjoying wind power.
- **FLAT STANDING AREA**
For extra comfort when paddling, windsurfing and wingsurfing.
- **FOOTSTRAP INSERTS**
Make it easy to know where to position the feet and always be in the right spot to trim the board.
**Footstraps do not come included with the board.*
- **DEEP CENTER CHANNEL**
Creates a flatter middle rocker for the most efficient and long-lasting glide.
- **BOARD SOCK INCLUDED**
Reduces paper waste and protects your board from dust, scratches, and UV damage. Made of stretchable polyester, it fits various board shapes and has a secure drawstring closure.
